

INFORMATION SHEET

DESCRIPTION

The Tyco EA0404 Warden Intercom Point (WIP) is designed specifically for use in emergency warning systems. WIPs are used to communicate between floor wardens and the main emergency evacuation panel. When the handset is lifted, the Firephone automatically calls the emergency evacuation panel.

When the emergency evacuation panel calls the WIP, the call tone sounds through the speaker in the body of the phone. Lifting the handset automatically transfers from the phone body speaker to the handset speaker.

The EA0404 is CSIRO listed for use with Tyco QE90 and Simplex Fire Products QE90 EWIS panels and approved as compliant with AS2220.

The EA0404 comes packaged with screws to facilitate wall mounting and a comprehensive instruction sheet.

Refer to EWIS panel manuals for wiring details.

SPECIFICATIONS

Operating Voltage	24Vdc
Operating Current (24Vdc)	30mA
Frequency Response	300 Hz to 3 kHz
Line Impedance (selectable)	600 Ohm/4k7 Ohm
Call Tone	>80dB 1W/1m
Operating Temperature	-10°C to +50°C
Relative Humidity (non-cond)	10 to 95%
Dimensions	210x80x72mm (HWD)
Weight	410g
Part Number	EA0404
