

LOCAL GAS CONTROL STATION

Local Gas Control Stations are used in gaseous fire extinguishing systems to provide local area manual control of a release.

The automatic version includes a Gas Inhibit switch, buzzer and LED, whereas the manual version does not.

Features

- Two versions to suit Automatic and Manual gas release systems
- Flip-cover break-glass “Gas Release” switch
- Gas Isolated indication
- “Gas Inhibit” switch and indication (Automatic version only)
 - Double action “Gas Inhibit” toggle switch
 - “Gas Inhibited” LED indication
 - Built-in “Gas Inhibited” buzzer
- Multiple units can be interconnected in a multidrop configuration
- Part numbers for ordering:
 - FP0570 Local Gas Control Station for Automatic Systems
 - FP0572 Local Gas Control Station for Manual Systems
