Compact Firefighter Facility

The Vigilant® Compact Firefighter Facility (FF) is a compact fire alarm repeater panel for use as a remote brigade access point to a fire alarm system. It provides an AS4428.1 compliant alphanumeric display of alarm information on a 2 line by 40 character LCD with a simple keypad. It is compatible with Panel-Link Networked fire alarm systems, e.g., MX4428/F4000, F3200, and Vigilant® RZDU panels - MX4428/F4000, F3200, FP1600/Omega 64 and Sigma 5. The Compact FF is able to display alarms and control all fire alarm panels connected, and this may be modified by programming to achieve a variety of display and control facilities.

Features

- **Remote Firefighter's Facility (FF) complying with AS4428.1**
- **Compact and attractive "slimline" cabinet style with flush mounting option**
- **Alphanumeric display, 2 lines x 40 characters**
