

## Multi-Zone Gas Control Modules

Gas Control Modules provide indication and control of 1-4 zones of gas extinguishing on F3200 and MX4428 fire panels. They come as pre-wired modules for easy connection into the fire alarm system (appropriate input/output modules are also required).

Convenient screw terminal connections are included for Local Gas Control Stations, Warning Signs (AVI Mk2), and the actuator output.

### Features

- Modules available for 1, 2, 3 & 4 gas control zones
- Easily added to 19" rack F3200 and MX4428 systems
- Additional inputs and relays required:
  - Zone and Relay Modules for F3200
  - ADRs and RRM's for MX4428
- Custom programming also required
- Separate indications and controls provided for each gas control zone
  - Gas Initiated and Manual Release - red LEDs
  - Gas Discharged - blue LED
  - Gas Inhibited, Gas Isolated and System Inoperative - yellow LEDs
- Gas Discharge Isolate switch disconnects both poles of the gas release circuit
- Screw terminals for Gas Control Station, gas release circuit, gas released switch and System Inoperative sign
- Two wire Alert/Evac output for AVI Mk2 warning signs.
- Space for fitting zone naming label
- **Part Numbers for ordering:**
  - 7U Door Modules:
    - ME0438 – 1 Zone
    - ME0439 – 2 Zone
    - ME0440 – 3 Zone
    - ME0441 – 4 Zones

1U Bracket Module:  
ME0442 – 1 Zone
